D: 479mm x W: 762mm x H: 558mm – 1000mm

Specifications (Minimum Safety Height Requirements)

Perfekt-T 30P

1. The range hood should be mounted at a minimum distance of 600mm from and electric or induction cooktop, and a minimum of 762mm above a gas cooktop for safety and optimum performance. If the instructions for installation of the gas cooktop specify a greater distance, this has to be taken into account. The exhaust air must not be discharged into a chimney which is used for exhausting fumes from other appliances, burning gas, or other fuels.

For the province of British Columbia

The base of the AEG range hoods are made of stainless steel and uses a stainless steel Filter. There are no plastic components on the lower side of the hood. In addition, the housing of the motor is made from metal.

These hoods are tested at 24" above gas cooktops in the production test facility. At this height, ignition is not possible. The hoods can be installed 24" above gas cooktops.

THESE MINIMUM SAFETY HEIGHT
REQUIREMENTS ARE FOR AEG RANGE
HOODS BEING INSTALLED OVER AN AEG OR
PORTER&CHARLES COOKTOPS ONLY.

AEG

AEG Appliances are designed and manufactured to the highest standards. Each appliance is covered by a comprehensive 2-year parts and labour warranty.

Refer to product warranty policy for complete terms and conditions.
