- Epicure style handle with chrome trim included. Optional accessory handle available in the Pro Style.

LOCATION REQUIREMENTS

- Operate the appliance only on a solid, stable and level surface. Do not operate on top of carpeting, or other soft surface.
- Locate the wine cellar in a convenient location, away from extreme heat and cold. Locate it away from direct sunlight. It should not be located next to ovens, grills or other sources of high heat. It is suggested that it be located in the coolest part of the room.
- Place your appliance on a floor that is strong enough to support it when it is fully loaded. It weighs 100 lbs (45 kG) unloaded.
- To ensure proper ventilation, the front of the unit must be completely unobstructed. Choose a well ventilated area with temperatures between 60° and 90° F. The units must be installed in an area protected from the elements (such as wind, rain, water spray or drips).
- Optimal spacing for ventilation around the appliance (for maximum efficiency) is 5 inches (12.7 cm) in back, at the sides and above. The Dacor wine cellar may be recessed in an opening between cabinets or installed at the end of a cabinet run using a side panel to enclose it. When installing in an enclosed space, the absolute minimum space is 1/4" (5.0 mm) of space on both sides, 1/2" (5.0 mm) of space at the top and 2 1/4" (5.7 cm) in back. See Diagram at right.
- The overall height of the appliance can be increased by 2 1/2" (6.4 cm) by adjusting the feet.
- The electrical outlet must be accessible after installation so that the user can unplug the appliance.
- It is advisable to install the appliance with sufficient ventilation in a dry and/or an air conditioned place to avoid condensation on build up on the door during periods of high humidity
