### OPENING/CLEARANCE DIMENSIONS

MODEL #		JFC2290RE		
		in	cm	
Α	Width (min.)	36%	93.0	
	Minimum width from side of refrigerator to fixed wall – door open 90° (full access to remove bins) Pro-Style® Stainless	2 <sup>5</sup> / <sub>8</sub>	6.7	
	Euro-Style Stainless	2	5.1	
В	Floating Glass	21/4	5.7	
	Minimum width from side of refrigerator to fixed wall – door fully open 125° Pro-Style® Stainless	10%	27.6	
	Euro-Style Stainless	103/8	26.4	
	Floating Glass	10¾	27.3	
С	Width of recommended electrical/ water installation area	34	86.4	
D	Height (min.)	7111//8	182.6	
E	Height of recommended electrical installation area (minmax.)	10- 24	25.4- 61.0	
F	Height of recommended water installation area	10	25.4	
G	Depth of recommended water installation area	1	2.5	
Н	Water line location – distance from side	24%	62.5	
ı	Water line location – distance from bottom	93/8	23.8	
e	Recommended electrical connection location			
w	Recommended water connection location			

### **ELECTRICAL REQUIREMENTS**

115 volt, 60 Hz, AC only, 15- or 20-amp fused, grounded circuit is required. A dedicated circuit is recommended. Use an outlet that cannot be turned off by a switch.

Minimum length of power cord is 60" (152.0 cm). Do not use an extension cord.

#### WATER PRESSURE REQUIREMENTS

A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa) is required to operate the water dispenser and ice maker. Call a licensed, qualified plumber with any questions about the water pressure.

### **Reverse Osmosis Water Supply**

**IMPORTANT:** The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa).

If a reverse osmosis water filtration system is connected to the cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).
