### LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for a 1/2" (6.35 mm) space on each side and at the top. When installing your refrigerator next to a fixed wall, leave 2 1/2" (6.35 cm) minimum clearance on the hinge side to allow for the door to swing open.

**NOTE:** It is recommended that you do not install the refrigerator near an oven, radiator, or other heat source. Do not install in a location where the temperature will fall below 55°F (13°C). For best performance, do not install the refrigerator behind a cabinet door or block the base grille.
