Installation

- The range hood should be mounted at a distance of 24" (600mm) from an electric or induction cooktop and 30" (762mm) above the agas cooktop for safety and optimum performance. If the instructions for installing the gas cooktop specify a greater distance, this has to be taken into account. The exhaust air must not be discharged into a flue used for exhausting fumes from other appliances burning gas or other fuels.
